Austin, Texas

Green Water Joins American Rainwater Catchment Systems Association

Green Water, a Texas-based rainwater harvesting company announces membership in the American Rainwater Catchment Systems Association (ARCSA) for 2010 membership.

The American Rainwater Catchment Systems Association is a non-profit organization that was founded in 1994 by Dr. Hari J. Krishna in Austin, Texas, to promote rainwater catchment systems in the United States. Our membership consists of professionals working in city, state, and federal government, academia, manufacturers and suppliers of rainwater harvesting equipment, consultants, and other interested individuals. Membership is not limited to the United States, and we encourage all rainwater harvesting enthusiasts to join our organization.

Today, over 650 people from around the world are ARCSA members, and ARCSA has offered many exceptional educational opportunities such as rainwater harvesting seminars, accreditation workshops and conferences featuring some of the leading professionals in RWH.

About Green Water:

Green Water, LLC is a leading Central Texas water conservation company. Green Water is committed to preserving Central Texas groundwater through a variety of water saving products and services. Green Water, LLC manufactures 100% recycled and reused rain barrels for rain water collection and rain harvesting. Green Water, LLC uses food-grade recycled barrels to produce 100% sustainable "green" rain barrels. Rain barrels from Green Water, LLC help reduce unneeded water waste from Central Texas declining aquifer watersheds. Green Water, LLC is committed to Central Texas water conservation efforts and supports numerous water saving initiatives and policies. Green Water, LLC is located in Austin, Texas and can be found at www.austingreenwater.com or emailed at info@austingreenwater.com
